

Skills for assessing common eye conditions and managing chronic otitis media

An interactive 2 hour lecture style presentation for GPs and GP registrars

2018

18

APRIL

**Limited seats
Book now!**

An education session for GPs to improve their knowledge and skills in the diagnosis of common eye conditions and assessment and management of chronic otitis media.

KEY OUTCOMES

- Develop an approach to the assessment of the eye and improve skills for objectively examining eye problems in the General Practice setting.
- To increase GPs' understanding of the differential diagnoses of common presenting eye symptoms, and to develop a safety framework in their diagnostic approach, including improved recognition and detection of red flags for serious eye conditions not to be missed.
- To improve understanding of the pathophysiology and chronic evolution of chronic otitis media.
- To differentiate between the different types of chronic otitis media and utilise the right treatments for the right presentation.
- To improve diagnosis and management of Eustachian tube dysfunction and have a safety net approach to red flags for when to refer.

SPEAKERS

Dr Rebecca Haward | *Ophthalmology Consultant*
– The Royal Victorian Eye and Ear Hospital

Dr Haward will be presenting on the assessment of common eye conditions.

Dr Jean-Marc Gerard | *ENT Consultant*
