

Sudden Vision Loss & Acute Ear Conditions

This two hour interactive education session will cover the assessment and management of patients presenting with sudden loss of vision or acute ear conditions.

Key session objectives:

Acute Ear conditions

- To increase confidence in the use of tuning fork and pneumatic otoscope to assist with diagnosis of emergent ear disease.
- To develop an approach to the management of acute ear presentations in general practice.
- To improve recognition of conditions requiring urgent referral.

Sudden Loss of Vision

- To develop a safety framework approach to the diagnostic assessment of patients presenting with sudden loss of vision
- To increase understanding of the management of some of the causes of sudden loss of vision, including appropriate referral pathways and timeframes

Speakers:

Dr Brian Ang, Consultant Ophthalmologist
The Royal Victorian Eye and Ear Hospital

Prof Stephen O'Leary, Consultant Otolaryngologist
The Royal Victorian Eye and Ear Hospital

Wednesday 3 May 2017
